## SUBJECT INDEX

Ammonia,
Elecrocatalytic reduction of nitrate and nitrite to hydroxylamine and ——— using metal cyclams (Taniguchi et al.) 199
Aniline,
Raman spectroscopic investigation of ——— : Adsorption and polymerisation (Holze) 253

4,4′-Bipyridinium groups,
catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by polypyrrole films containing ——— . Effects of film thickness, film composition and comparison with homogeneous catalysis (Coche, Moutet) 111
Bipyridyl,
redox and electrocatalytic properties of cobalt – ——— –polypyrrole film electrodes (Daire et al.) 95

Carbon,
catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and ——— felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis (Coche, Moutet) 111
Carbon dioxide,
behaviour of electrodispersed platinum electrodes for the voltammetric electrooxidation of reduced ——— (Marcos et al.) 189
Chlorine,
state of surface oxide films at Pt anodes and "volcano" behaviour in electrocatalysis for anodic ——— evolution (Roscoe, Conway) 163
Chromophore,
a polymer-film based photoelectrode containing immobilized quencher and ——— polymer blends (Hupp, Meyer) 59

Cobalt,
redox and electrocatalytic properties of ——— –bipyridyl–polypyrrole film electrodes (Daire et al.) 95
Composite membranes,
charge-controllable polypyrrole/polyelectrolyte ——— . Part II. Effect of incorporated anion size on the electrochemical oxidation–reduction process (Shimidzu et al.) 123
Condensed films,
on the formation of two-dimensional ——— at the interface mercury/ferron aqueous buffered solutions (Müller et al.) 137
Cyclams,
electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal ——— (Taniguchi et al.) 199

1,2-Dibromo-1,2-diphenylethane,
catalysis of ——— reduction on platinum and carbon felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis (Coche, Moutet) 111
Dimethylformamide,
study of the reactions of 9-nitroanthracene anion radicals and dianions in ——— by the controlled potential constant-voltage electrolysis method (Mendkovich et al.) 273
2,3-Dimethylpyridine,
investigation of the adsorption kinetics of ——— at the mercury/electrolyte interface (Wandlowski et al.) 261

Enzymes,
electrochemical immobilisation of ——— . Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole (Bartlett, Whitaker) 37
Electrochemical immobilisation of ——— . Part I. Theory (Bartlett, Whitaker) 27

Ferron,
on the formation of two-dimensional condensed films at the interface mercury/ —— aqueous buffered solutions (Müller et al.) 237
Function generator,
a flexible —— for computer-based electrochemical instruments (He, Faulkner) 277

Gallium arsenide,
hypochlorite reduction of —— : a multifaceted reaction (Notten) 211
Glucose oxidase,
electrochemical immobilisation of enzymes. Part II. —— immobilised in poly-*N*-methylpyrrole (Bartlett, Whitaker) 37
Guanine,
electrochemical oxidation of guanosine. Formation of some novel —— oligonucleosides (Subramanian, Dryhurst) 137
Guanosine,
electrochemical oxidation of —— . Formation of some novel guanine oligonucleosides (Subramanian, Dryhurst) 137

Halogens,
sorption from the gaseous phase in stripping voltammetry of —— (Scholz et al.) 303
Hydroxylamine,
electrocatalytic reduction of nitrate and nitrite to —— and ammonia using metal cyclams (Taniguchi et al.) 199
Hypochlorite,
—— reduction at GaAs: A multifaceted reaction (Notten) 211

Immobilisation,
electrochemical —— of enzymes. Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole (Bartlett, Whitaker) 37
Electrochemical —— of enzymes. Part I. Theory (Bartlett, Whitaker) 27
Intermediates,
the galvanostatic double-pulse method in the study of the kinetics of stepwise electrode processes involving the adsorption of —— (Kopistko) 67

Kinetic parameters,
a simple and alternative method for the evaluation of electrode —— from normal pulse polarographic data (Workie, Solomon) 49

Langmuirian adsorption,
formalism for performing chronocoulometry at a stationary planar or spherical electrode. Part I. Theoretical treatment with —— (Guaus et al.) 1

Mercury,
investigation of the adsorption kinetics of 2,3-dimethylpyridine at the —— /electrolyte interface (Wandlowski et al.) 261
On the formation of two-dimensional condensed films at the interface —— /ferron aqueous buffered solutions (Müller et al.) 237

Nitrate and nitrite,
Electrocatalytic reduction of —— to hydroxylamine and ammonia using metal cyclams (Taniguchi et al.) 199
9-Nitroanthracene,
study of the reactions of —— anion radicals and dianions in dimethylformamide by the controlled potential constant-voltage electrolysis method (Mendkovich et al.) 273

Oligonucleosides,
electrochemical oxidation of guanosine. Formation of some novel guanine —— (Subramanian, Dryhurst) 137

Photoelectrode,
a polymer-film based —— containing immobilized quencher and chromophore polymer blends (Hupp, Meyer) 59
Planar electrode,
formalism for performing chronocoulometry at a stationary —— or spherical electrode. Part I. Theoretical treatment with Langmuirian adsorption (Guaus et al.) 1
Platinum,
behaviour of electrodispersed —— electrodes for the voltammetric electrooxidation of reduced carbon dioxide (Marcos et al.) 189
Catalysis of 1,2-dibromo-1,2-diphenylethane reduction on —— and carbon felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis (Coche, Moutet) 111
State of surface oxide films at —— anodes and "volcano" behaviour in electrocatalysis

for anodic $Cl_2$ evolution (Roscoe, Conway) 163

Platinum group metals,
effect of the nature of ——— on the formation and properties of adatom silver coatings (Podlovchenko, Kolyadko) 225

Poly-*N*-methylpyrrole,
electrochemical immobilisation of enzymes. Part II. Glucose immobilised in ——— (Bartlett, Whitaker) 37

Poly(pyrrole–nickel(II)pyridiniumporphyrin),
a ——— -modified electrode (Deronzier, Latour) 295

Polypyrrole,
catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by ——— films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis (Coche, Moutet) 111
Charge-controllable ——— /polyelectrolyte composite membranes. Part II. Effect of incorporated anion size on the electrochemical oxidation–reduction process (Shimidzu et al.) 123
Redox and electrocatalytic properties of cobalt–bipyridyl– ——— film electrodes (Daire et al.) 95

Quencher,
a polymer-film based photoelectrode containing immobilized ——— and chromophore polymer blends (Hupp, Meyer) 59

Silver,
effect of the nature of platinum group metals on the formation and properties of adatom ——— coatings (Podlovchenko, Kolyadko) 225
Inner-layer capacity at the pzc for perfect (111), (100) and (110) faces of ——— . Surface area and capacitance contributions of superficial defects for real electrodes (Valette) 285

Spherical electrode,
formalism for performing chronocoulometry at a stationary planar or ——— . Part I. Theoretical treatment with Langmuirian adsorption (Guaus et al.) 1

Stepwise electrode processes,
the galvanostatic double-pulse method in the study of the kinetics of ——— involving the adsorption of intermediates (Kopistko) 67

"Volcano" behaviour,
state of surface oxide films at Pt anodes and ——— in electrocatalysis for anodic $Cl_2$ evolution (Roscoe, Conway) 163
